

# COMP-10018: Test 3

Time limit: 90 minutes 100% open book

---

## Prerequisites:

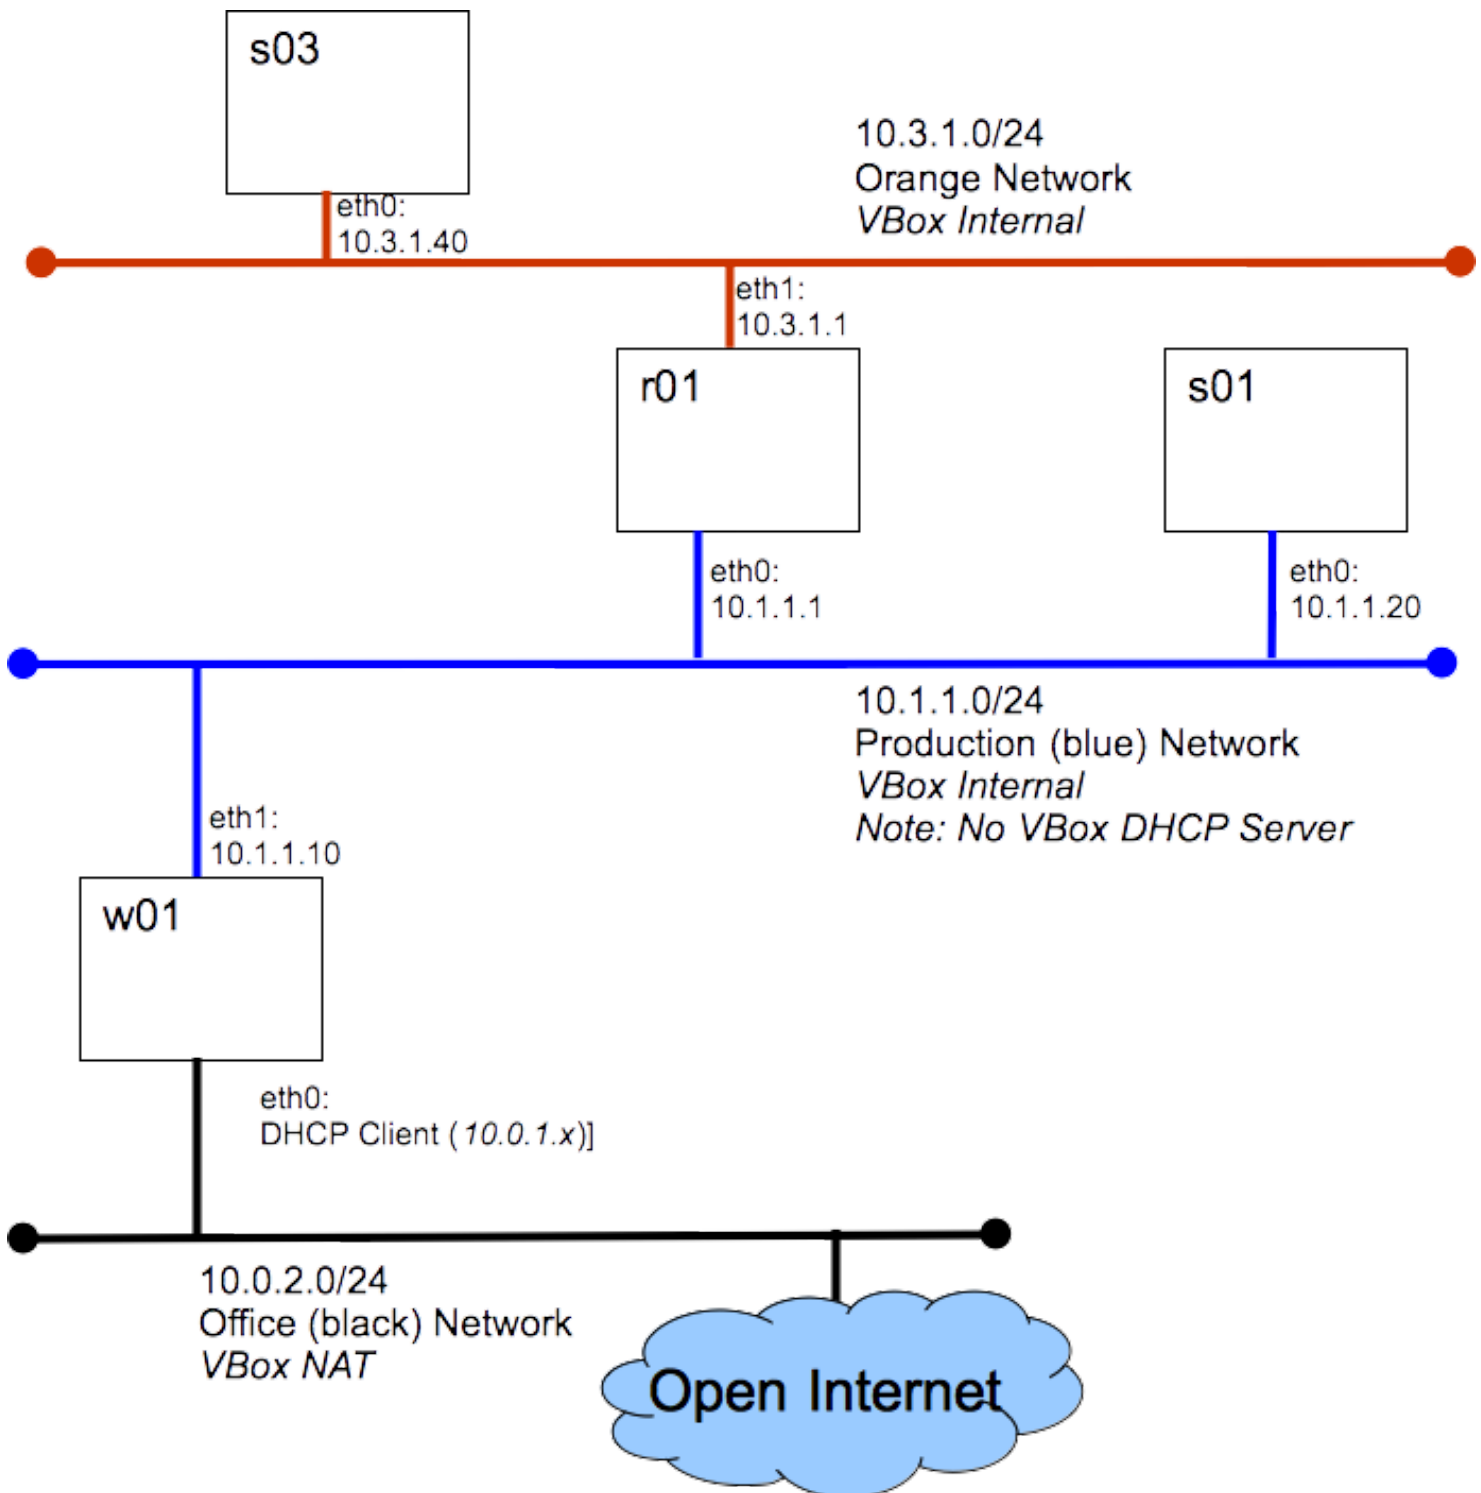

### Before you start this test you must have:

- The comp-10018 virtual lab appliance, **comp-10018-vlab.ova** found on the CSAIT lab systems.
  - Oracle VirtualBox software, found on all lab systems at the college and available from <http://virtualbox.org>
- 

## Grading:

You will run a host info script on **s01** and **r01**. You will submit **two** reports to eLearn.

## Part A: Build this configuration (9 points)

1. Create s03 and r01 by cloning s01
2. Update the host files on s01 and s03
3. s01 and s03 must be able to communicate via IP
4. **Make no changes to w01** (w01 does not need to ping s03)

## Part B: Config File Backup (1 point)

On **s01** create a cpio archive named **/tmp/conf.cpio** containing every file residing in the **/etc** directory tree who's name ends in **.conf**
